iMarket Communications, Inc.

Trader Voice and Data

*Connectivity and Trading Technology For All
Business Sizes*

About Us

iMarket Communications, Inc. provides quality, high-performance telecom services built around the real-world needs of the global financial community. Constructing dedicated trader voice networks that target your specific business requirements, we are committed to the development of long-lasting partnerships with our customers. Our qualified team members insist upon proactive service and 24/7 support, and strive to make every experience with iMarket a rewarding one.

When you trust iMarket with your communication needs, you'll enjoy breakthrough voice & data solutions and uninterrupted contact with clients and employees. Additional benefits of your iMarket partnership include:

Reliable, cost-effective service

- Use of fully redundant digital networks through major telco carriers
- Trader voice, private-line solutions
- Global business reach
- Product flexibility and scalability
- Service and follow through excellence

Our Products

iMarket Communications specializes in Trader Voice and data networking services that are reliable, scalable and cost-effective, for the purpose of managing the client's demanding operational requirements. Striving to exceed the level of service required by the financial, banking and energy industries, we provide the ideal product tailored to the client's needs.

iMarket's products and services include:

- Auto/Manual Ring-downs
- SIP/VoIP Ring-downs
- Hoot & Holler (2&4 Wire Shoutdown)
- T1/E1 Voice & Data
- Call Forking/Multi-leg Circuits
- Disaster Recovery (BCP Solutions)
- Ethernet Circuits

iMarket's trader voice solutions are a cost-effective way to meet the unique business challenges of small firms and large corporations. Tailored to your specific needs, iMarket's integrated communication products offer the flexibility and mobility required by the fast-paced global financial community.

Our Technology

iMarket's leading-edge trader voice solutions offer the power and flexibility you need to streamline critical communications, connect to clients and ensure business continuity. A cost-effective way to manage faced-paced business requirements, iMarket's Trader Voice products make it easy to manage regulatory requirements while communicating with the speed and flexibility required by the evolving financial industry.

Trader voice allows you to seamlessly reach existing and emerging markets. The benefits include:

- Complete circuit management
- Proactive monitoring of network infrastructure health
- Industry-best speed and reliability
- Global support teams
- Optimized network design
- Service portal for total network control
- Regulatory accountability (SOX, etc.)

The iMarket network is managed and monitored from both US and UK iMarket Operation Centers, thus providing disaster recovery management and monitoring of the client network in the event of an iMarket Operation Center failure.
